

WARNING

The World Health Organization's Director-General is about to become the ruler of the World's Health unless we stop him!

The World Health Organization (WHO)'s 194 member nations are being asked to vote on two documents in the last week of May that will transfer unprecedented powers from our nations to the World Health Organization. Here's what is happening:

- A new **Pandemic Treaty** is being proposed that would legalize the worldwide use of experimental, liability-free vaccines, impose health censorship and much more.
- Major amendments to the **International Health Regulations** are being proposed that give the **WHO** the power to impose worldwide lockdowns, vaccine mandates and much more.

If either one of these two documents passes, it will be a **massive blow** to our civil rights, our Constitution, our national sovereignty and our individual freedoms. Both documents are considered international treaties and are intended to be enforceable.

1. Nations will be **forced** to pass laws to allow unlicensed, rapidly-produced and liability-free vaccines to be used for future pandemics.
2. The WHO will be able to order global **vaccine mandates, lockdowns, quarantines** and border closures.
3. The WHO Director-General (**who isn't a physician**) would decide which treatments you will get, which treatments you will be prevented from getting, and which information you and your doctor will be allowed to see.
4. The WHO will require nations to surveil their citizens' online activities and **censor** all information that does not agree with the WHO's health narratives.
5. The WHO is building a **biowarfare** agent library: requiring that nations share "potential pandemic pathogens" (a.k.a. biological warfare agents), decode their genomes in high containment labs, and place their sequences online in public databases - virtually guaranteeing lab escapes and more pandemics.

6. The WHO is negotiating major amendments to its International Health Regulations in the backroom, **behind closed doors**, and we may not find out what is in them until after they have been voted on. *Why so much secrecy?*
7. The WHO removed the words “human rights, dignity and freedom of persons” from the International Health Regulations amendments. **The WHO thinks your basic human rights are negotiable!**
8. The proposed Treaty gives the WHO a **blank check** to spend on pandemic preparedness. *How much will it cost?* No one is saying, but estimates suggest the WHO budget could increase from 4 to 30 billion dollars a year or more.
9. The WHO intends to **enforce compliance**. “National IHR Authorities” in every country will coordinate with the WHO’s compliance committee and implementation committees to compel compliance. The 2 documents will be binding (**compulsory**) for every nation.
10. *When will all this go into effect?*

The Treaty will go into effect for countries that ratify it after one month, which could be as early as **July 2024**. The Amendments will take 12 months after passage, or end of **May 2025** if they are passed.

We must #StopTheWHO Now!

Our organizations DoorToFreedom.org and the SovereigntyCoalition.org have much more information about what’s happening at the World Health Organization, and we provide updated alerts on how you can take action to stop this!
